- free access to a library of workpapers, reports and correspondence
- free unlimited multi-user access and optional work time sheet
- integrated calendar, appointment time scheduler and more....

A brief warning about Trust Account Fraud

The risk for trust account fraud is always present but adverse economic times always increases that risk.

Regulators and professional accounting bodies require work in adherence to auditing practice standards including sampling techniques and 3rd party verifications so work limited to just checklists may not satisfy PI insurers.

Defending negligence claims requires a documented client audit methodology not a one size fits all checklist.

ATAME industry programs have integrated guidance notes, workpapers and reports, to provide the auditor or examiner with risk mitigation tools and commercially realistic options, to easily tailor and professionally document their work.

Our aim is auditors using our programs are compliant and profitable so if you need help selecting or using our programs please contact us

We offer a money back guarantee so please contact us for a full refund if you are not satisfied with any program purchase
